

REMARKS

1. Applicants request that the 122 pages of specification, claims and abstract filed in the priority case, Serial No. 09/506,286, be replaced with the attached 104 pages of substitute specification, claims and abstract. Applicants assert the substitute specification may contain inadvertent pagination changes compared to the originally filed specification, but that the content is identical to the originally filed specification, and, therefore, no new matter has been entered.

2. A corrected computer readable form of the Sequence Listing in the present application was submitted in the parent application, Serial No. 10/065,133, on December 5, 2002. Pursuant to 37 CFR § 1.821(e), Applicants enclose herewith an identical duplicate paper and computer readable form (CRF) of that corrected Sequence Listing, SEQ ID NO:1 through SEQ ID NO:108. Pursuant to 37 CFR § 1.821(f), the information included in the computer readable form of the Sequence Listing is identical to the paper copy.

Applicants authorize the filing fee for this divisional application, calculated for a large entity, of \$770 to be charged to Deposit Account 081930. Please debit any underpayment or credit any overpayment to Deposit Account No. 081930.

Respectfully submitted,

Dated: December 12, 2003
